PROFESSIONAL SUMMARY

Python developer and data analyst with two years of professional experience and a growing portfolio in machine learning, NLP, and data visualization. Currently training in AI at NSTI Chennai under Microsoft and Edunet Foundation, where I've built real projects from scratch — not just coursework. My background in customer support taught me data quality, reporting, and communicating with stakeholders. I'm looking for a role where I can put these skills to use on real problems.

TECHNICAL SKILLS

- Programming & Backend: Python, SQL, FastAPI, Flask, REST APIs, Streamlit, Jupyter Notebook
- Data Analysis & BI: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Power BI, DAX, Excel (Pivots, VLOOKUP, Charts), EDA, KPI Reporting
- NLP & ML: NLTK, TF-IDF, Cosine Similarity, Regression, Classification, Reinforcement Learning, OpenCV
- Databases: MySQL, SQLite, Relational Modeling, SQL Joins, Subqueries, Aggregations
- Tools & Deployment: Git, GitHub, Streamlit Cloud, VS Code, Jupyter

PROJECTS

AI Powered Smart Classroom Analytics System

2025 – 2026

Python, OpenCV, Scikit-learn, Pandas, Streamlit, SQLite

- Built a computer vision module using OpenCV to detect student presence, attention levels, and classroom occupancy in real time; results were stored in SQLite for session-level trend analysis.
- Trained a classification model on engagement and behavior data using Scikit-learn; delivered a Streamlit dashboard showing per-session KPIs and instructor-facing analytics.
- Recognized by NSTI Chennai with a Certificate of Achievement (supported by Microsoft, implemented by Edunet Foundation) for outstanding performance in completing this mini-project under AIPA.

Resume Screening & Candidate Matching System

2026

Python, NLP, Scikit-learn, SQLite, REST API, Streamlit

- Engineered an NLP pipeline using TF-IDF vectorization and cosine similarity to rank and score candidates against job descriptions; backed by a SQLite database storing profiles, scores, and job metadata.
- Built a REST API layer for resume submission and async processing; delivered a Streamlit frontend for real-time score visualization and side-by-side candidate comparison.

Employee Attrition Analytics Dashboard

2026

Power BI, DAX, Excel, Relational Data Modeling

- Designed an interactive HR analytics dashboard in Power BI with 15+ DAX measures covering attrition rates, tenure distribution, and department-level trends — all linked to dynamic slicers and drill-through reports.
- Cleaned and modeled relational data in Excel and Power BI across multiple tables; delivered executive-level summary views that supported data-backed retention strategy decisions.

Smart Home Energy Consumption Prediction System

2026

Python, Scikit-learn, Pandas, NumPy, SQLite, Streamlit

- Built an ML forecasting system (regression + classification) on time-series energy data; ran EDA to surface seasonal patterns and appliance-level correlations, with results stored in SQLite for historical querying.

- Delivered a Streamlit dashboard with KPI charts, forecast confidence indicators, and exportable summary reports for business consumption review.

Recipe Collection Dashboard

2025

Python, Flask, SQLite, REST API, Streamlit

- Developed a Flask backend integrating a third-party REST API for recipe discovery, storing data in a normalized SQLite schema with ingredient and category tables; automated data refresh via scheduled ETL routines.

PROFESSIONAL EXPERIENCE

Customer Support Executive — Foundever

Sep 2023 – Sep 2025

- Handled customer interactions for the Avast and AVG Antivirus Retention process, assisting customers with subscription renewals and resolving product-related concerns.
- Maintained accurate customer records and followed company processes to ensure service quality; tracked KPIs including resolution rates and CSAT scores using Excel to support team reporting.
- Worked closely with team members to meet performance targets and consistently deliver a positive customer experience in a high-volume, fast-paced environment.
- Developed practical skills in communication, problem-solving, and time management while handling retention-focused customer scenarios daily.

EDUCATION

B.Tech — Information Technology, Jerusalem College of Engineering (Anna University) 2018 – 2022

Aggregate: 79% | Chennai, Tamil Nadu

TECHNICAL TRAINING

AI Programming Assistant (AIPA - CTS) — NSTI Chennai

Sep 2025 – Present

DGT / Microsoft / Edunet Foundation | NCVT-Certified | Craftsmen Training Scheme (CTS)

- Pursuing a one-year NCVT-certified Artificial Intelligence Programming Assistant (AIPA) program under the Craftsmen Training Scheme (CTS) at NSTI Chennai, supported by DGT, Microsoft, and Edunet Foundation — with monthly assessments and project presentations across all modules.
- Completed hands-on projects in Python, SQL, data analytics, machine learning, computer vision, NLP, and Generative AI — applying concepts to real-world use cases through structured monthly deliverables.
- Received a Certificate of Achievement from NSTI Chennai, supported by Microsoft and implemented by Edunet Foundation, for outstanding performance on the AI Powered Smart Classroom Analytics System.

CERTIFICATIONS

- Career Essentials in Software Development — Microsoft & LinkedIn Learning | 2025–2026
- GitHub Responsible AI — Microsoft Learn | 2026
- Introduction to Cloud Infrastructure (Cloud Concepts) — Microsoft & LinkedIn | 2026
- AI For Everyone — DeepLearning.AI (Andrew Ng) | 2020
- TCS iON Career Edge — Young Professional | Tata Consultancy Services | 2023
- IoT-Based Home Automation with Mobile App Development — TVS Training & Services (AICTE Samridhi Scheme) | Oct 2021

ACHIEVEMENTS

- Certificate of Achievement — AI Powered Smart Classroom Analytics System | Microsoft & Edunet Foundation (AIPA) | NSTI Chennai | 2025–2026
- TechSprint Hackathon — Participant | Google Developer Group (GDG) BPIT | Jan 2026
- Senior Executive Member — Epoch Club (IT Dept.) | Jerusalem College of Engineering | 2021–2022
